Caiinno

WE THINK BIG
WE WANT CHANGES

About us

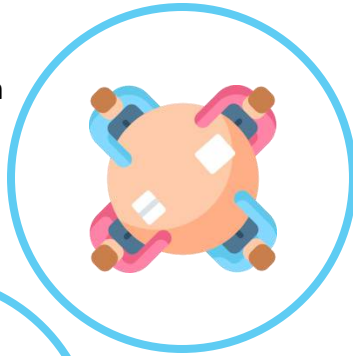

CAIINNO is a think tank founded by people living in Mexico after finishing their graduate studies abroad and looking to bring about a positive change for their country. This, by taking advantage of the experience, knowledge, and networks gained mainly during their time as beneficiaries of a Fulbright scholarship.

Our Objective

Help solve the challenges faced by Mexico in 9 areas through research, initiatives, and project execution which increase transparency, inclusion, and innovation in the country. To achieve this, we make use of the principles of **INNOVATION**, as well as our own experience and knowledge.

In addition, we aim for our projects to have a cross-cutting approach that impacts and benefits all 9 areas.

Citizen participation
and Democracy

Education

Economic
development

Business and
Enterprising

INNOVATION

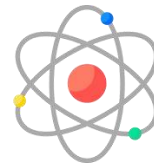

Public Policy and Rule
of Law

Transparency and
Government
Accountability

Gender Issues

Science, Technology
and Innovation

Intellectual
Property

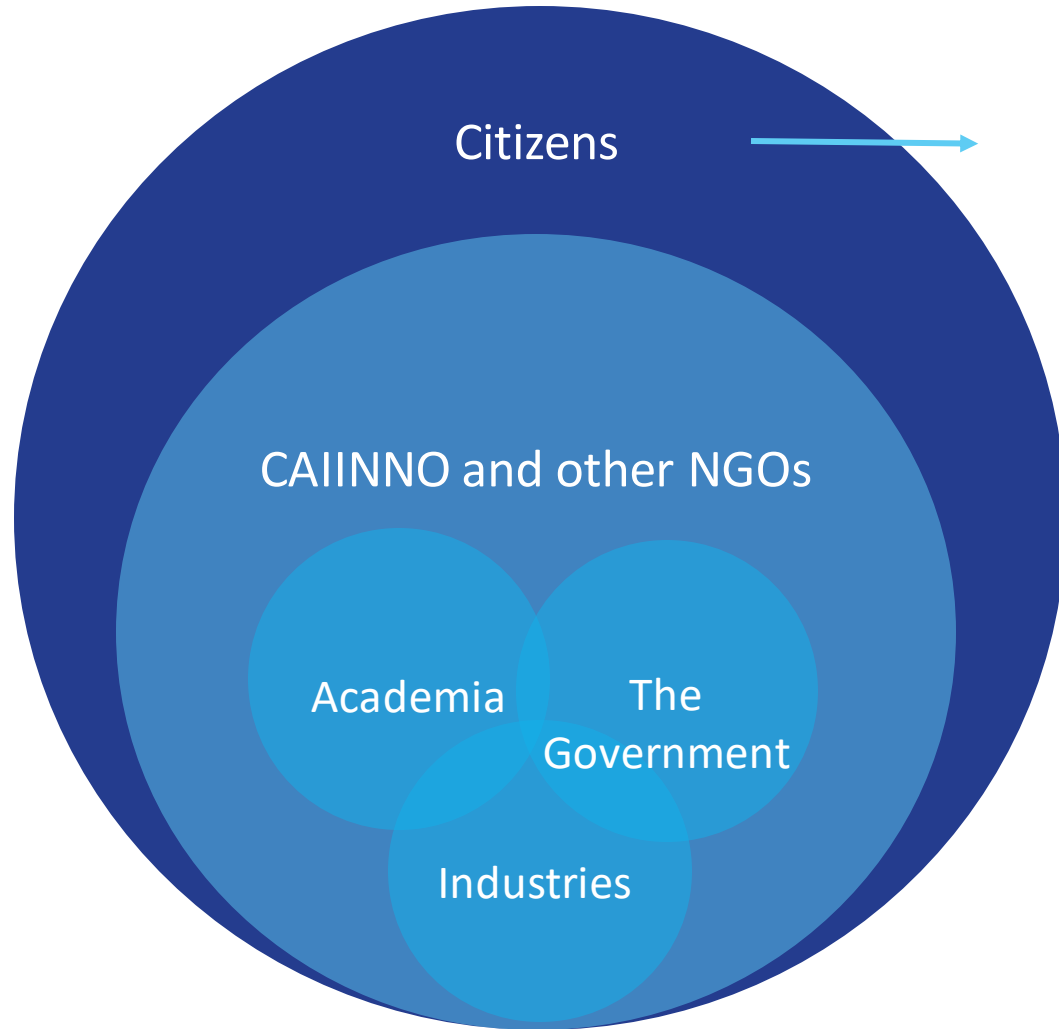

Principles of Innovation

We have developed our own version, based on the Principles of Innovation proposed by the United Nations Development Programme which includes:

1. Working on solutions with users.
2. Understanding the ecosystem.
3. Increasing impact through design.
4. Building sustainability.
5. Making the most of data.
6. Using open standards, open data, open-source models, and open innovation.
7. Reusing and improving.
8. Avoiding damage to the environment or to society.
9. Seeking collaboration.

Our Aim

Collaboration between these parties in order to build and achieve our objectives.

This happens through participation and impact on four areas.

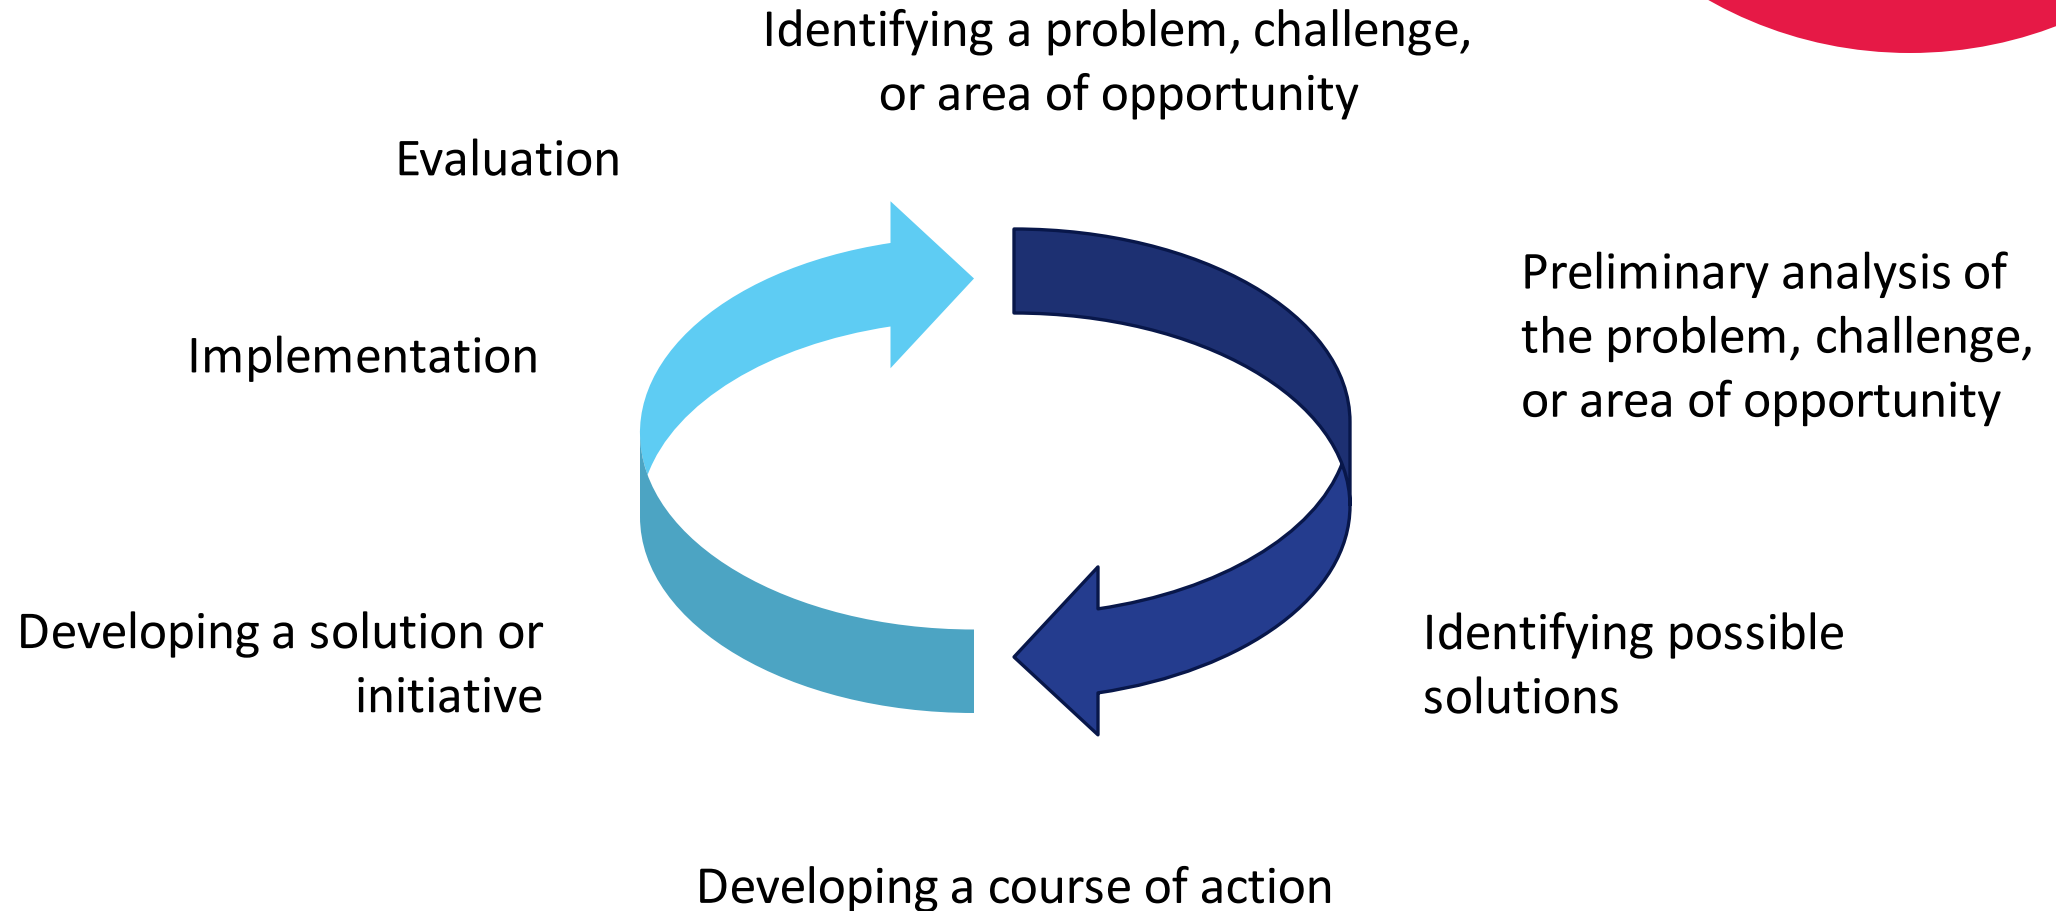

Public Policy

Governmental
Agenda

Law

Public
Agenda

How we achieve it

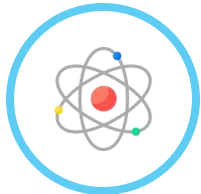

Our impact

01 Creative economy and knowledge economy for the recovery of Latin America and the Caribbean from the effects of COVID-19.

Education

Science,
Technology and
Innovation

Public Policy and
Rule of Law

Business and
Enterprising

CAIINNO designed a project proposing the use of the knowledge economy and the creative economy as options to help Latin America and the Caribbean to overcome the economic crisis that they are facing due to the pandemic.

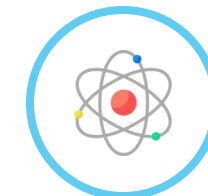

ACHIEVEMENTS

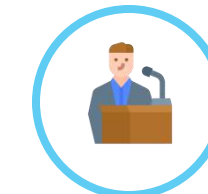

The proposal designed by CAINNO was selected by the Interamerican Development Bank in its call for “proposals for recovery of Latin America and the Caribbean” by COVID-19. This proposal was the only one selected from Mexico and one of the 10 chosen from around the world. The proposal was focused on ways in which the knowledge economy and the creative economy can help region’s recovery.

Science, Technology
and Innovation

+

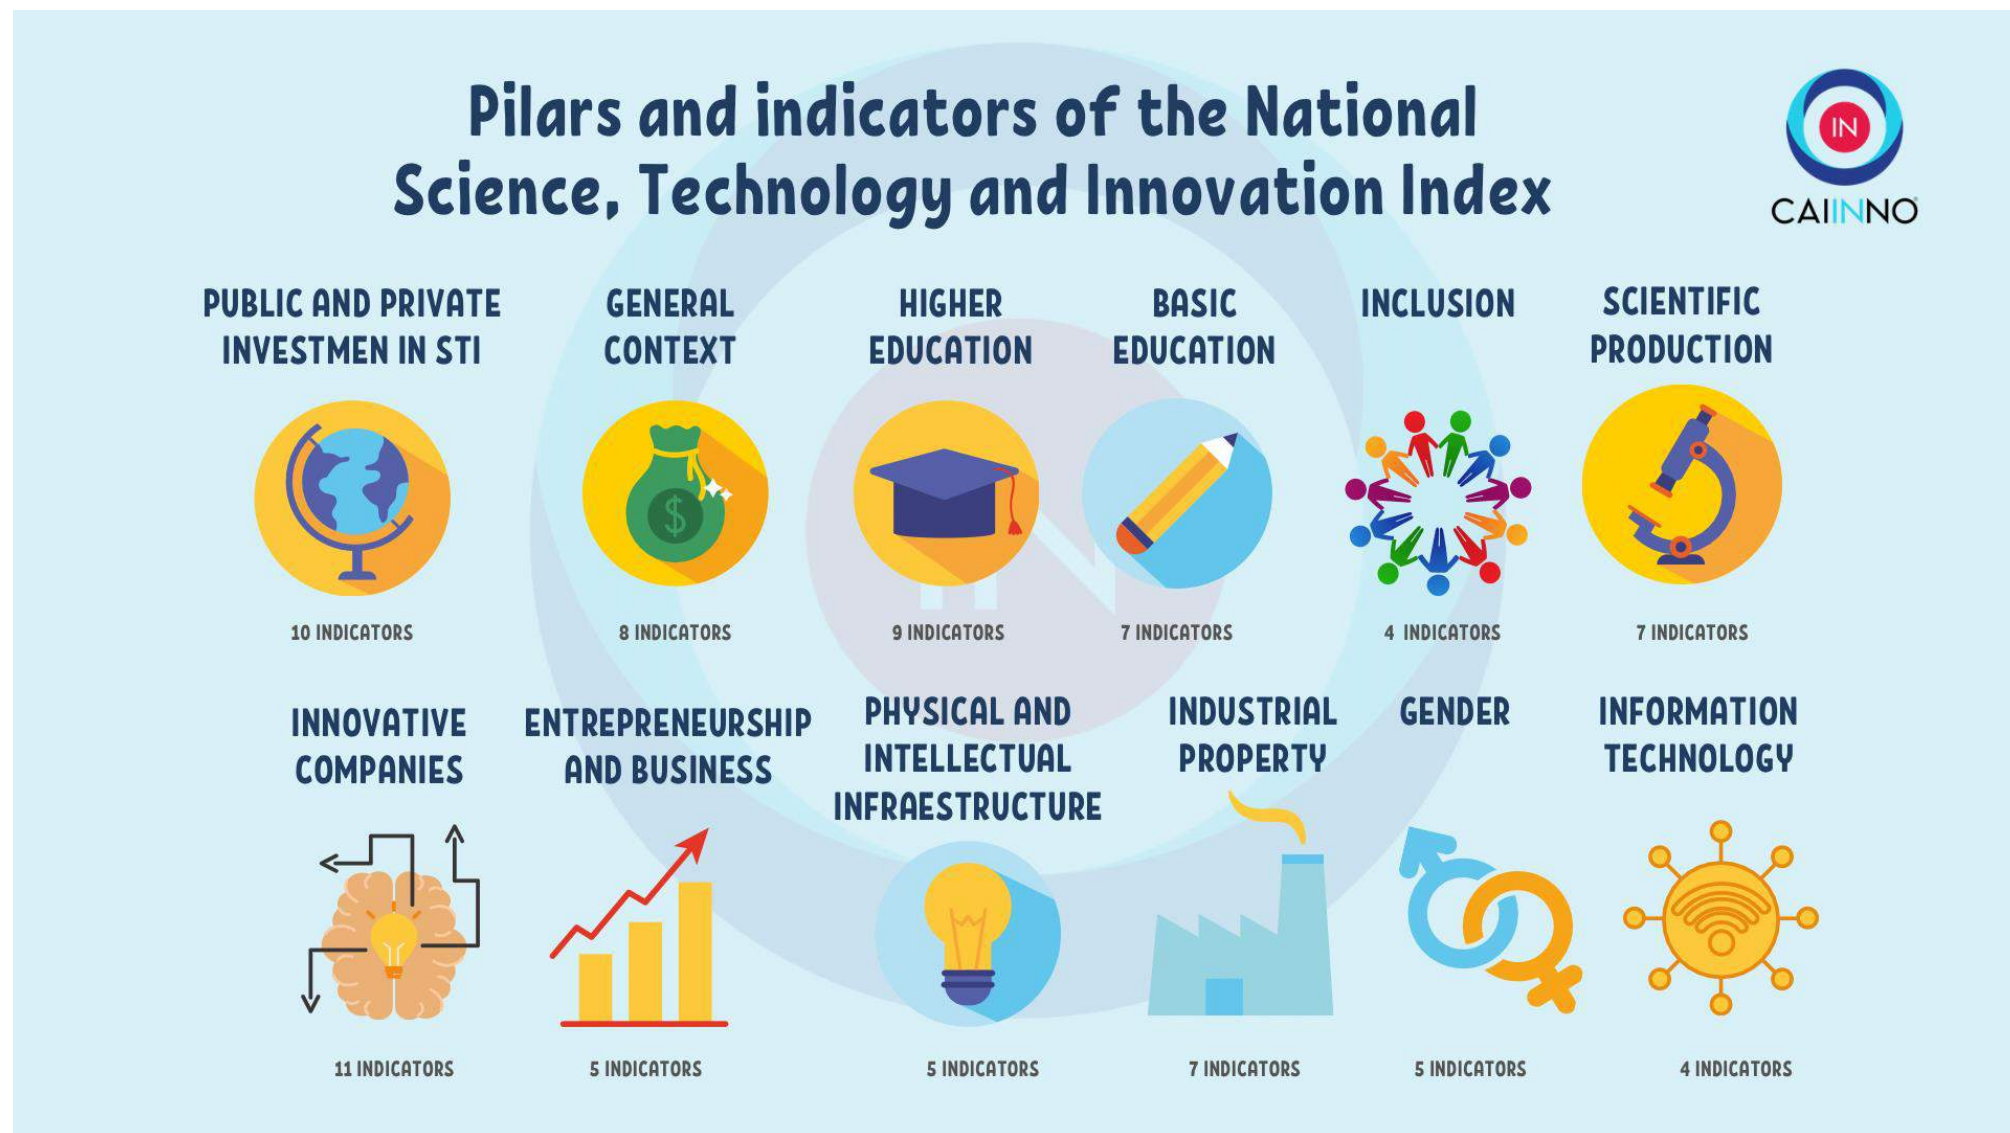

Intellectual
Property

Elements that are not usually taken into account are now considered, as they are still valuable for CAIINNO and for developed countries, given that they contemplate an approach where Science, Technology and Innovation benefits society.

What did we take into account?

We considered 12 pillars. This structure allows us to keep an Index with a social perspective for considering indicators related to gender, poverty, among others.

ACHIEVEMENTS

*Attention from the most important national media
AND the use of the Secretariat of Economy for state
indexes throughout the country.*

EL ECONOMISTA

En busca de un vínculo con la ciudadanía

El terreno de la CTI no es árido y exclusivo para académicos; en la presentación del índice, estuvieron jugadores de la sociedad civil, como los emprendedores independientes.

“Con la idea de generar una cuarta hélice en el tema de Ciencia, Tecnología e Innovación (CTI), como un agente que logre juntar en la misma mesa al gobierno, la academia y al sector empresarial en pro de la ciudadanía”, el Centro de Análisis para la Investigación en Innovación (Caiinno) se dio a la tarea de realizar el Índice Nacional de Ciencia, Tecnología e Innovación 2015.

INFORMACIÓN ECONÓMICA Y ESTATAL

Nayarit

De acuerdo al Índice Nacional de Ciencia, Tecnología e Innovación 2015, publicado por el Centro de Análisis para la Investigación en Innovación (CAIINNO), la entidad se ubica en la 7ª posición de las 32 entidades. Entre los principales indicadores que reporta dicho índice, la entidad ocupa los siguientes lugares¹:

- 22º en Infraestructura material e intelectual
- 24º en Inversión pública y privada en ciencia, tecnología e innovación
- 24º en Producción científica
- 19º en Tecnologías de la Información

Gender Issues

Science, Technology and Innovation

Intellectual Property

ACHIEVEMENTS

*From paper to reality,
involvement with the Law*

The data bank and research allowed for the justification of a reform effort to amend the Industrial Property Act, in whose drafting we were cited as the main reference.

INICIATIVAS DE CIUDADANOS LEGISLADORES

Estado Actual: [Cámara de Diputados](#) [Ficha Técnica](#)

De la Dip. María Eloísa Talavera Hernández, del Grupo Parlamentario del Partido Acción Nacional, con proyecto de decreto por el que se adiciona un inciso g) a la fracción XII del artículo 6º de la Ley de la Propiedad Industrial.

Específicamente para los temas de innovación y propiedad industrial poco se ha analizado en México. El Centro de Análisis para la Investigación en Innovación, A.C., en su estudio "Estado General de la Propiedad Intelectual en México: otra perspectiva" [*], señala que existen varios estados en los que en 2015 del total de patentes otorgadas no figura ninguna mujer.

Asimismo, de acuerdo a la información del [Banco de información estadística de invenciones por género, del mismo Centro de Análisis](#) que abarca los años 2014, 2015 y 2016, muestra la diferencia en cifras que existe entre Ciudad de México y el resto del país. Por ejemplo, dentro del rubro de solicitudes de patente donde participan mujeres como inventoras, señala que en la Ciudad de México se presentaron 123 en 2014 y 2015, mientras que en Nuevo León fueron 50 en 2014 y 44 en 2015.

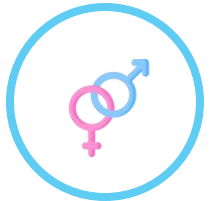

Derivado de lo anteriormente expuesto, someto a consideración de esta Soberanía la siguiente:

Artículo Único. Se adiciona un inciso g) a la fracción XII del artículo 6º. de la Ley de la Propiedad Industrial, para quedar como sigue:

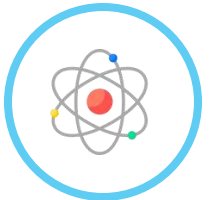

Artículo 6º.

g) Diseñar, implementar y evaluar las políticas públicas que tengan por objeto el fomento y protección de los derechos de propiedad industrial, principalmente en el ámbito de la innovación y creación de invenciones a nivel estatal, así como las políticas públicas destinadas a incrementar la participación de las mujeres primordialmente en la actividad inventiva. A fin de lograr lo anterior, podrá celebrar convenios con otros organismos tanto del gobierno federal como de las entidades federativas, así como con instituciones públicas o privadas ya sean de carácter nacional o extranjera.

Electoral observatory for Science and Technology--Branch 38

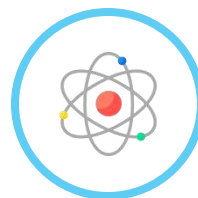

Public Policy and
Rule of Law

Citizen
participation
and
Democracy

Transparency and
Government
Accountability

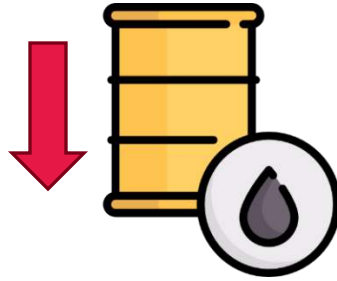

Science,
Technology and
Innovation

Its goal is to verify that the money from the electoral fines reaches the National Council of Science and Technology, and the Local Science and Technology Organizations, as well as ensuring that these organizations are transparent with the way in which the money is used. This, to know in what they invest the money, how they decide on what to invest, and how the investments are aligned with public policies on science, technology and innovation. On the other hand, it seeks to encourage citizen participation.

Example 7

Why does it matter?

Federal Budget
38

As consequence of the decrease in oil prices.

The federal government reduced public spending in several areas in 2015 and 2016.

Nacional Council of Science and Technology's annual budget for 2015 and 2016 was cut.

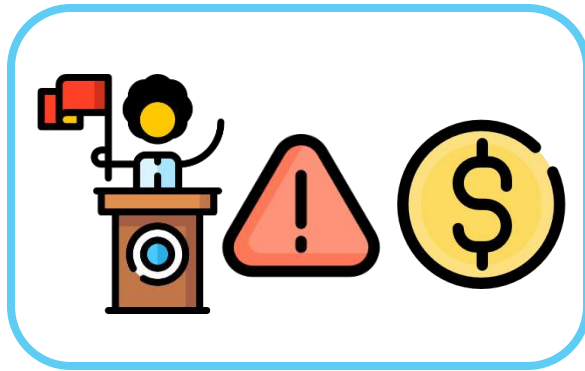

Estimates are between 700 and 900 million pesos per year.

Between 2005 and 2015 the Nacional Council of Science and Technology has received more than 2 billion pesos proceeding from electoral fines.

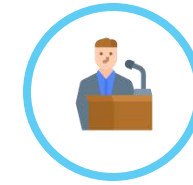

However, the allocation of this money had not been transparent.

What can be done with these electoral fines?

ELECTORAL FINES IMPOSED on political parties during the last federal elections 2017-2018 amount of
\$872,600,000.00 Mexican pesos (\$49 million dollars)

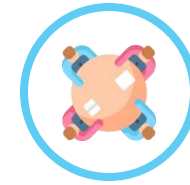

Equivalent to

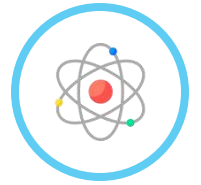

Public Policy and Rule of Law

Transparency and Government Accountability

Citizen participation and Democracy

Science, Technology and Innovation

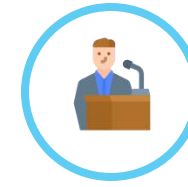

3,520 Government scholarships for M.A. (for 24 months)

1,320 Government scholarships for Ph.D (for 48 months)

What has the money from penalty fees been invested in at a local level?

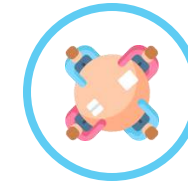

Public Policy and Rule of Law

+

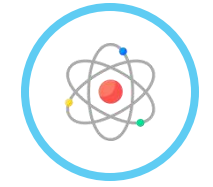

Transparency and Government Accountability

+

Citizen participation and Democracy

+

Science, Technology and Innovation

CHIHUAHUA

A good example is the spent of **\$200,000.00** (Mexican pesos) to financially support the project entitled “Remediación de agua industrial utilizando zinc obtenido de pilas desechadas.”
(Industrial Water Remediation using zinc from discarded batteries)

MORELOS

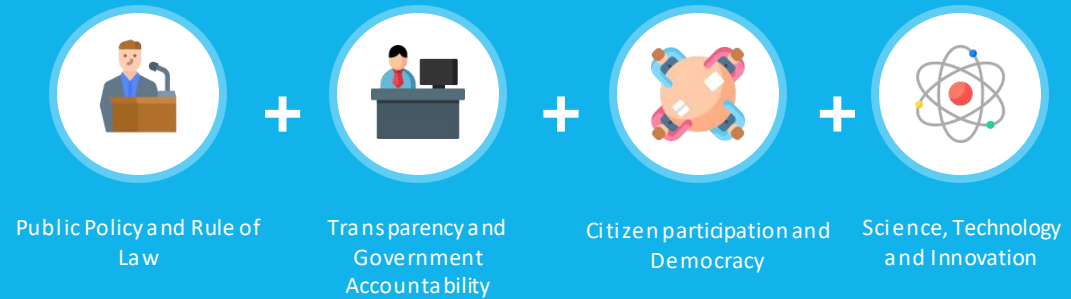

The largest investment was in the publication of the book “Jatropha en Morelos, un ejercicio de Sustentabilidad,” costing **\$600,000.00** (Mexican pesos) (Jatropha plant in Morelos, implementing sustainability)

This amount is equivalent to **37.04%** of the total amount of penalty fees charged.

ACHIEVEMENTS

Attention from national media

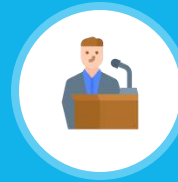

- **Patricio Ballados** – Prerogative Chief Executive
- **Javier González** –National Government Officer from UNDP in Mexico
- **Lauro Cortés** –Coahuila's Science and Technology Council's Managing Director

Citizen participation and Democracy

+

Science, Technology and Innovation

From paper to reality, involvement with the Law

QUE REFORMA Y ADICIONA EL ARTÍCULO 458 DE LA LEY GENERAL DE INSTITUCIONES Y PROCEDIMIENTOS ELECTORALES, A CARGO DE LA DIPUTADA MARÍA ELOÍSA TALAVERA HERNÁNDEZ, DEL GRUPO PARLAMENTARIO DEL PAN

Los presupuestos en materia de ciencia y tecnología de los organismos estatales, de acuerdo al [Centro de Análisis para la Investigación en Innovación, A.C. \(CAIINNO\)](#), también sufrieron recortes en sus presupuestos como en el El Consejo Nacional de Ciencia y Tecnología y los organismos estatales encargados de la promoción, fomento y desarrollo de la ciencia, tecnología e innovación que reciban recursos obtenidos por la aplicación de sanciones económicas señaladas en el presente numeral deberán reportar trimestralmente al Instituto Nacional Electoral o al Organismo Público Local Electoral, según sea el caso, un informe del ejercicio presupuestal del uso y destino de los recursos, así como las consideraciones que hicieron para determinar en qué invertirlo. Asimismo, dicho informe deberá estar a disposición del público en general a través de su página de Internet.

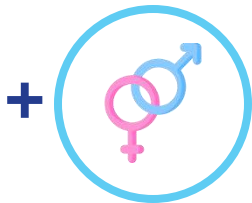

Based on CAIINNO's research, a legislative proposal was developed to make transparent the distribution of fund from the electoral sanctions, by the amendment of the Electoral Act.

08

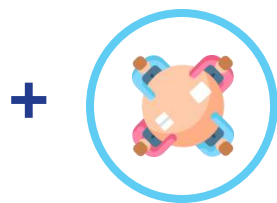

How can we have a less corrupt country and more informed citizens during election periods?

Education

Gender Issues

Citizen participation
and Democracy

Millennials

**University
Students**

Example 8

We decided to start by
addressing two issues:

Lack of Citizen
participation

Lack of civic
education

Through:

Innovation and
ICTs

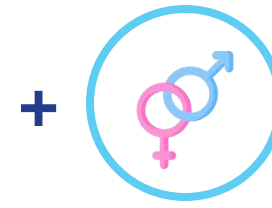

Education

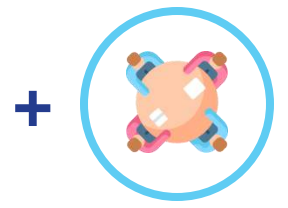

A new approach

Education

Gender Issues

Citizen participation and
Democracy

How do we contribute?

The development of a platform that united INE's and other institutions efforts to:

1. Promote civic education;
2. Inform about political and electoral rights, and;
3. Obtaining information about candidates.

Our target audience:

- Millennials;
- University students;
- Mexicans living abroad, and;
- Citizens with the highest possible level of high school education.

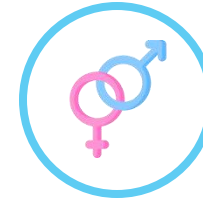

Avoiding ignorance,
indifference and lack of
information.

Example 8

Our solution is

Education

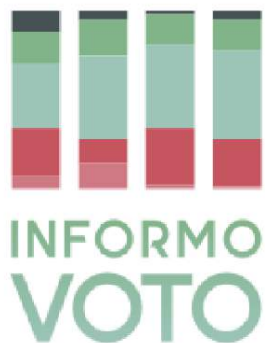

Gender Issues

Citizen participation and
Democracy

To provide civic education through a platform designed for our main audience.

To promote the importance of citizen participation in Millennials and university students during election periods.
